WORK EXPERIENCE

Coders for Causes

Project Member – Backend Engineer

Perth, Western Australia

Jun 2024 – Jul 2024

- Utilised Django to develop scalable, maintainable backend services, improving system reliability and supporting growing user demands.
- Designed and implemented RSVP endpoints to streamline event registration and confirmations, enhancing user experience and operational efficiency.
- Developed and executed comprehensive API tests to ensure the reliability and performance of event-related functionalities.

Zonta House Refuge Association

Data Migration and Software Setup Intern

Perth, Western Australia

Nov 2023 – Dec 2023

- Consolidated and organised data from multiple sources into main spreadsheets for seamless integration into new software system, reducing migration time by 30%.
- Executed thorough data quality checks and audits to ensure accuracy of transferred information, resulting in a 95% error-free migration process.

PROJECT EXPERIENCE

N-CSR Form Tracker

- Collaborated within a team of 6 to design a responsive interface using HTML, CSS, and JavaScript, creating an intuitive and user-friendly experience for the client.
- Utilised Python for web scraping to retrieve N-CSR from data, ensuring accurate data integration within the application.
- Developed a role-based access system within the web application using Flask, enabling secure, differentiated user privileges.
